**General Relativity and Relativistic Astrophysics (Theoretical and Mathematical Physics)** Norbert Straumann

In 1979 I gave graduate courses at the University of Zurich and lectured in the 'Troisieme Cycle de la Suisse Romande' (a consortium of four universities in the french-speaking part of Switzerland), and these lectures were the basis of the 'Springer Lecture Notes in Physics', Volume 150, published in 1981. This text appeared in German, because there have been few modern expositions of the general theory of relativity in the mother tongue of its only begetter. Soon after the book appeared, W. Thirring asked me to prepare an English edition for the 'Texts and Monographs in Physics'. Fortunately E. Borie agreed to translate the original German text into English. An excellent collaboration allowed me to revise and add to the contents of the book. I have updated and improved the original text and have added a number of new sections, mostly on astrophysical topics. In particular, in collaboration with M. Camenzind I have included a chapter on spherical and disk accretion onto compact objects. This book divides into three parts. Part I develops the mathematical tools used in the general theory of relativity. Since I wanted to keep this part short, but reasonably self-contained, I have adopted the dry style of most modern mathematical texts. Readers who have never before been confronted with differential geometry will find the exposition too abstract and will miss motivations of the basic concepts and constructions.

### **From reader reviews:**

#### **Franklin Richter:**

In this 21st one hundred year, people become competitive in most way. By being competitive today, people have do something to make these people survives, being in the middle of the particular crowded place and notice through surrounding. One thing that often many people have underestimated the item for a while is reading. Yep, by reading a publication your ability to survive enhance then having chance to stand than other is high. In your case who want to start reading some sort of book, we give you that General Relativity and Relativistic Astrophysics (Theoretical and Mathematical Physics) book as basic and daily reading publication. Why, because this book is more than just a book.

#### **Jerry Bonner:**

The guide untitled General Relativity and Relativistic Astrophysics (Theoretical and Mathematical Physics) is the book that recommended to you to learn. You can see the quality of the reserve content that will be shown to you. The language that publisher use to explained their way of doing something is easily to understand. The copy writer was did a lot of analysis when write the book, hence the information that they share to your account is absolutely accurate. You also might get the e-book of General Relativity and Relativistic Astrophysics (Theoretical and Mathematical Physics) from the publisher to make you considerably more enjoy free time.

#### **Doris Trumbull:**

Do you like reading a reserve? Confuse to looking for your preferred book? Or your book had been rare? Why so many query for the book? But almost any people feel that they enjoy intended for reading. Some people likes examining, not only science book but in addition novel and General Relativity and Relativistic Astrophysics (Theoretical and Mathematical Physics) or even others sources were given expertise for you. After you know how the truly amazing a book, you feel desire to read more and more. Science reserve was created for teacher or maybe students especially. Those guides are helping them to add their knowledge. In some other case, beside science guide, any other book likes General Relativity and Relativistic Astrophysics (Theoretical and Mathematical Physics) to make your spare time far more colorful. Many types of book like here.

#### **Rachel Cady:**

E-book is one of source of knowledge. We can add our know-how from it. Not only for students and also native or citizen want book to know the change information of year to be able to year. As we know those textbooks have many advantages. Beside all of us add our knowledge, can bring us to around the world. From the book General Relativity and Relativistic Astrophysics (Theoretical and Mathematical Physics) we can have more advantage. Don't that you be creative people? To get creative person must prefer to read a book. Only choose the best book that appropriate with your aim. Don't end up being doubt to change your

life with that book General Relativity and Relativistic Astrophysics (Theoretical and Mathematical Physics).  
You can more desirable than now.
