## **HOW TO DESIGN AND BUILD AN ELECTRIC CAR OR VEHICLE** Stuart Mills

At last a resource book is available to help you turn that EV dream in to reality. Never before has ALL the information you need been available from one place. NOT A BORING BOOK FULL OF MATHS AND DIFFICULT TO UNDERSTAND EQUATIONS LIKE THE OTHERS. This book covers everything from chassis design to body design, from pattern (buck) making to mould (mold) making and from motors and controllers to the batteries that power them, all explained in easy to understand terms. Subjects such as torque requirements aerodynamics and gear ratios are covered and even the black art of suspension and steering geometry. When you have conquered all those areas I cover the road legality process and even inform you of sources for EV parts at the right price. So come on in and join the electric vehicle revolution. I have had many years of experience with developing all sorts of vehicles and I have also always had a passion for electric propulsion. I'm glad to be of service to like minded people. I share all of my trade secrets with you, learn from my 30 years of experience, enjoy.

#### **Tanya Minor:**

As a university student exactly feel bored to help reading. If their teacher expected them to go to the library in order to make summary for some guide, they are complained. Just tiny students that has reading's heart and soul or real their leisure activity. They just do what the teacher want, like asked to the library. They go to at this time there but nothing reading critically. Any students feel that studying is not important, boring along with can't see colorful pics on there. Yeah, it is to become complicated. Book is very important for yourself. As we know that on this age, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. So , this HOW TO DESIGN AND BUILD AN ELECTRIC CAR OR VEHICLE can make you sense more interested to read.
