Integral Operators in Non-Standard Function Spaces: Volume 2: Variable Exponent Hölder, Morrey-Campanato and Grand Spaces (Operator Theory: Advances and Applications)

Vakhtang Kokilashvili, Alexander Meskhi, Humberto Rafeiro, Stefan Samko

Integral Operators in Non-Standard Function Spaces: Volume 2: Variable Exponent Hölder, Morrey-Campanato and Grand Spaces (Operator Theory: Advances and Applications) Vakhtang Kokilashvili, Alexander Meskhi, Humberto Rafeiro, Stefan Samko

This book, the result of the authors' long and fruitful collaboration, focuses on integral operators in new, non-standard function spaces and presents a systematic study of the boundedness and compactness properties of basic, harmonic analysis integral operators in the following function spaces, among others: variable exponent Lebesgue and amalgam spaces, variable Hölder spaces, variable exponent Campanato, Morrey and Herz spaces, Iwaniec-Sbordone (grand Lebesgue) spaces, grand variable exponent Lebesgue spaces unifying the two spaces mentioned above, grand Morrey spaces, generalized grand Morrey spaces, and weighted analogues of some of them.

The results obtained are widely applied to non-linear PDEs, singular integrals and PDO theory. One of the book's most distinctive features is that the majority of the statements proved here are in the form of criteria.

The book is intended for a broad audience, ranging from researchers in the area to experts in applied mathematics and prospective students.

From reader reviews:

Lula Barnes:

With other case, little individuals like to read book Integral Operators in Non-Standard Function Spaces: Volume 2: Variable Exponent Hölder, Morrey-Campanato and Grand Spaces (Operator Theory: Advances and Applications). You can choose the best book if you like reading a book. As long as we know about how is important the book Integral Operators in Non-Standard Function Spaces: Volume 2: Variable Exponent Hölder, Morrey-Campanato and Grand Spaces (Operator Theory: Advances and Applications). You can add knowledge and of course you can around the world by just a book. Absolutely right, because from book you can recognize everything! From your country until foreign or abroad you will find yourself known. About simple matter until wonderful thing it is possible to know that. In this era, we could open a book or perhaps searching by internet product. It is called e-book. You can utilize it when you feel bored to go to the library. Let's read.

Eric Vegas:

What do you concerning book? It is not important along? Or just adding material when you really need something to explain what yours problem? How about your time? Or are you busy particular person? If you don't have spare time to perform others business, it is gives you the sense of being bored faster. And you have free time? What did you do? Everybody has many questions above. They must answer that question because just their can do that will. It said that about guide. Book is familiar in each person. Yes, it is correct. Because start from on guardería until university need this kind of Integral Operators in Non-Standard Function Spaces: Volume 2: Variable Exponent Hölder, Morrey-Campanato and Grand Spaces (Operator Theory: Advances and Applications) to read.

Ramona Wegener:

Spent a free time to be fun activity to complete! A lot of people spent their sparettime with their family, or their very own friends. Usually they undertaking activity like watching television, about to beach, or picnic inside park. They actually doing same thing every week. Do you feel it? Do you need to something different to fill your own free time/ holiday? Might be reading a book can be option to fill your cost-free time/ holiday. The first thing you ask may be what kinds of reserve that you should read. If you want to attempt look for book, may be the book untitled Integral Operators in Non-Standard Function Spaces: Volume 2: Variable Exponent Hölder, Morrey-Campanato and Grand Spaces (Operator Theory: Advances and Applications) can be good book to read. May be it is usually best activity to you.

Young Legg:

This Integral Operators in Non-Standard Function Spaces: Volume 2: Variable Exponent Hölder, Morrey-Campanato and Grand Spaces (Operator Theory: Advances and Applications) is brand new way for you who

has interest to look for some information mainly because it relief your hunger associated with. Getting deeper you onto it getting knowledge more you know otherwise you who still having small amount of digest in reading this Integral Operators in Non-Standard Function Spaces: Volume 2: Variable Exponent Hölder, Morrey-Campanato and Grand Spaces (Operator Theory: Advances and Applications) can be the light food for you because the information inside this book is easy to get by means of anyone. These books build itself in the form which is reachable by anyone, sure I mean in the e-book web form. People who think that in book form make them feel tired even dizzy this e-book is the answer. So there is not any in reading a publication especially this one. You can find actually looking for. It should be here for a person. So , don't miss this! Just read this e-book kind for your better life and also knowledge.
