Security and Sport Mega Events: A complex relation (Sport in the Global Society - Contemporary Perspectives)

This edition stresses some critical reflections regarding security policies before and during Sport Events in our contemporary era of generalized insecurity. Sport competitions at the national, European and global levels have evolved in terms of economic investment, social importance and media coverage. However, this evolution has brought with it major political concerns. At the same time, the dominant question regarding the organization of competitions in our post-modern, neoliberal risk societies is the creation of a safe and secure *milieu*; the need of construction of an environment of life where sport events and the multiple activities and interests related to them can be kept safe from any risk and potentially harmful occurrence. In the name of security, anticipatory *dispositifs* and risk management practices, rationalities and technologies of government do not exclusively attempt to prevent disastrous incidents or to maintain order *in situ*. Involving a set of heteronomous public and private organizations and bureaucracies, state "experts" and not state "security managers", proactive security strategies seek to imagine the future, to pre-empt, to act in advance, to anticipate possible catastrophic incidents by managing populations and spaces in order to set, to assure, with any cost, the ideal conditions.

The aim of this volume is to highlight the complex set of legal provisions, surveillance and policing practices, discourses, bureaucratic procedures and spatial and architectural forms underpin the security governance of sport events and their effects in the contemporary era of widespread uncertainty.

This book was published as a special issue of *Sport in Society*.
