Mitochondria and Cell Death (Cell Death in Biology and Diseases)

Mitochondria and Cell Death (Cell Death in Biology and Diseases)

This volume examines the role of mitochondria in different types of cell death, including apoptotic and necrotic cell deaths. Topics discussed include mitochondrial outer membrane permeabilization (MOMP) and the permeability transition pore; core processes such as calcium handling, fission and fusion, reactive oxygen species generation, and maintenance of mitochondrial DNA fidelity and protein folding homeostasis; and retrograde signaling between mitochondria and other cellular components, including the important role of mitochondria in antiviral immunity. The expertly authored chapters are drawn from multidisciplinary international perspectives, lending a nuanced and comprehensive approach to the material.

Mitochondria and Cell Death, part of the *Cell Death in Biology and Diseases* series, is invaluable reading for graduate students, researchers, and clinicians in the fields of neuroscience, oncology, gastroenterology, and hepatology, as well as those interested in the study of mitochondria and cell biology.

From reader reviews:

Karen Imes:

As people who live in the modest era should be change about what going on or details even knowledge to make these people keep up with the era that is certainly always change and progress. Some of you maybe may update themselves by looking at books. It is a good choice for you personally but the problems coming to an individual is you don't know what type you should start with. This Mitochondria and Cell Death (Cell Death in Biology and Diseases) is our recommendation to make you keep up with the world. Why, as this book serves what you want and need in this era.

Robert Young:

This Mitochondria and Cell Death (Cell Death in Biology and Diseases) is brand new way for you who has interest to look for some information given it relief your hunger info. Getting deeper you in it getting knowledge more you know or else you who still having small amount of digest in reading this Mitochondria and Cell Death (Cell Death in Biology and Diseases) can be the light food for yourself because the information inside this book is easy to get by simply anyone. These books develop itself in the form which is reachable by anyone, yeah I mean in the e-book web form. People who think that in reserve form make them feel sleepy even dizzy this publication is the answer. So there is absolutely no in reading a reserve especially this one. You can find what you are looking for. It should be here for an individual. So , don't miss it! Just read this e-book kind for your better life as well as knowledge.

Carlos Garcia:

With this era which is the greater particular person or who has ability to do something more are more precious than other. Do you want to become considered one of it? It is just simple approach to have that. What you need to do is just spending your time little but quite enough to possess a look at some books. One of many books in the top list in your reading list is Mitochondria and Cell Death (Cell Death in Biology and Diseases). This book that is qualified as The Hungry Hillside can get you closer in turning into precious person. By looking way up and review this book you can get many advantages.

Ann Conley:

Publication is one of source of knowledge. We can add our know-how from it. Not only for students but also native or citizen need book to know the up-date information of year to year. As we know those guides have many advantages. Beside we add our knowledge, also can bring us to around the world. With the book Mitochondria and Cell Death (Cell Death in Biology and Diseases) we can have more advantage. Don't someone to be creative people? To be creative person must want to read a book. Just choose the best book that suitable with your aim. Don't become doubt to change your life with that book Mitochondria and Cell Death (Cell Death in Biology and Diseases). You can more pleasing than now.
