Morphogenesis and Pattern Formation in Biological Systems: Experiments and Models

Morphogenesis and Pattern Formation in Biological Systems: Experiments and Models

A central goal of biology is to decode the mechanisms that underlie the processes of morphogenesis and pattern formation. Concerned with the analysis of those phenomena, this book integrates experimental and theoretical aspects of biology for the construction and investigation of models of complex processes. It offers an interdisciplinary approach to the pattern formation problems and provides a scope of forthcoming integrated biology including experiments and theories.
