High Accuracy Adds Up to Big Wins in ETFs for Disciplined Traders
New Research Proves "Mean Reversion" Stronger Than Ever

Professionals know that a falling stock often becomes a good opportunity to take a profitable short-term trade. That's because countless statistical analyses over decades have shown that stocks tend to "revert to the mean" -- they "snap back" quickly to the short-term average price.

In order for you to trade successfully using this principle, you need more. You need a precise methodology to identify where and when the buying opportunity is most likely to occur. You need to define and time your Entry and Exit. You need statistics to show potential gains, holding periods, and winning rates for every trade you want to consider.

You'll get all that and more when you receive your copy of High Probability Trading with Multiple Up & Down Days -- the latest strategy guidebook from Connors Research.

Using 7½ years of ETF trading data, we've quantified the probabilities for dozens of strategy variations you can use to trade mean reversion reversals with confidence. Here is what you'll receive:

The exact trading rules. This is not a black box – full disclosure of the rules is given to you

- How to identify high-probability setups -- many with an over 80% win rate
- How to select the best limit entries that fit your trading style
- Where to exactly place your orders each day
- Precise rules on where and when to exit for maximum profits

Consistent Trading Results for BOTH Long & Short Side Trades
