Nursing Outcomes Classification (NOC), 4e Sue Moorhead PhD RN, Marion Johnson PhD RN, Meridean L. Maas PhD RN FAAN, Elizabeth Swanson PhD RN

This text standardizes the terminology and criteria for measurable or desirable outcomes as a result of interventions performed by nurses. Clinicians, students, educators, researchers, and administrators in a variety of clinical, educational and research venues can use the classification, which serves as an important focus for both cost containment and effective care. This new edition is even more comprehensive and includes specific indicators that can be used as intermediate outcomes or to evaluate and rate the patient in relation to outcome achievement.

- Supplies 385 research-based nursing outcome labels to provide standardization of expected patient outcomes.
- Provides links between NOC outcomes and NANDA nursing diagnoses to promote clinical decision-making.
- Presents a definition, a list of indicators, a publication facts line, and references for each outcome.
- Includes 58 brand-new outcome labels that address important issues such as burn healing and burn recovery, cancer management, preterm infant care, and drug abuse cessation behavior.
- Provides 67 revised outcome labels that supply the most up-to-date information on a wide variety of outcomes, including caregiver stressors, asthma self-management, substance use control, and pain level.
