Why are people so interested in what they and others throw away? This book shows how this interest in what we discard is far from new ? it is integral to how we make, build and describe our lived environment. As this wide-ranging new study reveals, waste has been a polarizing topic for millennia and has been treated as a rich resource by artists, writers, philosophers and architects. Drawing on the works of Giorgio Agamben, T.S. Eliot, Jacques Derrida, Martin Heidegger, James Joyce, Bruno Latour and many others, *Waste: A Philosophy of Things* investigates the complexities of waste in sculpture, literature and architecture. It traces a new philosophy of things from the ancient to the modern and will be of interest to those working in cultural and literary studies, archaeology, architecture and continental philosophy.
