Drops and Bubbles in Contact with Solid Surfaces (Progress in Colloid and Interface Science)

Drops and Bubbles in Contact with Solid Surfaces (Progress in Colloid and Interface Science)

The third volume in a series dedicated to colloids and interfaces, **Drops and Bubbles in Contact with Solid Surfaces** presents an up-to-date overview of the fundamentals and applications of drops and bubbles and their interaction with solid surfaces. The chapters cover the theoretical and experimental aspects of wetting and wettability, liquid–solid interfacial properties, and spreading dynamics on different surfaces, including a special section on polymers.

The book examines issues related to interpretation of contact angle from nano to macro systems. Expert contributors discuss interesting peculiarities, such as the phenomena of super-spreading and super-hydrophobicity. They discuss specific solid surfaces—for example, reactions and wetting of liquid metals at high temperatures—and the interaction between nano-bubbles at solid surface and nano-particles at liquid interfaces. The book also includes a chapter on electro-wetting.

Given the range of topics covered in this volume, the state-of-art content is useful to readers looking for an introductory overview as well as those looking for in-depth exploration of material related to the interaction of fluids with solid surfaces. It is a valuable contribution to the field of characterization of solid surfaces and can be used as a working tool or to stimulate further study for researchers and students.

From reader reviews:

Mark Dunn:

Why don't make it to become your habit? Right now, try to ready your time to do the important action, like looking for your favorite e-book and reading a e-book. Beside you can solve your condition; you can add your knowledge by the e-book entitled Drops and Bubbles in Contact with Solid Surfaces (Progress in Colloid and Interface Science). Try to the actual book Drops and Bubbles in Contact with Solid Surfaces (Progress in Colloid and Interface Science) as your friend. It means that it can to become your friend when you feel alone and beside regarding course make you smarter than in the past. Yeah, it is very fortunated to suit your needs. The book makes you more confidence because you can know everything by the book. So , let's make new experience as well as knowledge with this book.

Robert Bell:

The e-book untitled Drops and Bubbles in Contact with Solid Surfaces (Progress in Colloid and Interface Science) is the e-book that recommended to you to see. You can see the quality of the e-book content that will be shown to you actually. The language that writer use to explained their ideas are easily to understand. The author was did a lot of investigation when write the book, to ensure the information that they share to your account is absolutely accurate. You also could get the e-book of Drops and Bubbles in Contact with Solid Surfaces (Progress in Colloid and Interface Science) from the publisher to make you considerably more enjoy free time.

Lisa Walker:

A lot of book has printed but it is different. You can get it by web on social media. You can choose the best book for you, science, witty, novel, or whatever by simply searching from it. It is named of book Drops and Bubbles in Contact with Solid Surfaces (Progress in Colloid and Interface Science). You can contribute your knowledge by it. Without making the printed book, it might add your knowledge and make you actually happier to read. It is most crucial that, you must aware about publication. It can bring you from one destination to other place.

Drew Dube:

What is your hobby? Have you heard that question when you got students? We believe that that problem was given by teacher with their students. Many kinds of hobby, Every individual has different hobby. So you know that little person such as reading or as looking at become their hobby. You should know that reading is very important and also book as to be the point. Book is important thing to incorporate you knowledge, except your teacher or lecturer. You get good news or update regarding something by book. Different categories of books that can you take to be your object. One of them is Drops and Bubbles in Contact with Solid Surfaces (Progress in Colloid and Interface Science).
