Extended Electromagnetic Theory, Space Charge in Vacuo and the Rest Mass of Photon (World Scientific Series in Contemporary Chemical Physics)

B Lehnert, S Roy, Lehnert, Bo Lehnert, Sisir Roy

This book presents extended forms of the Maxwell equations as well as electromagnetic fields, based on a non-zero divergence of the electric field and a non-zero electric conductivity in vacuo. These approaches, which predict new features of the electromagnetic field, such as the existence of both longitudinal and transverse solutions, the existence of space-charge current in vacuo, and steady electromagnetic equilibria, have possible applications to charge and neutral leptons and new photon physics. The present theory can also clear up some unsolved problems, such as the total reflection of light at the interface between a vacuum and a dissipative medium, and the appearance of an angular momentum of the photon, thereby leading to a rest mass and an axial magnetic field component of the photon. This axial magnetic field component may be related to the B(3) field proposed by Evans and Vigier. A new gauge condition has been proposed to maintain consistency of the theory with the non-zero photon mass. Several consequences of the non-zero mass of the photon are also discussed, especially in the astrophysical context.

From reader reviews:

Regina Laporte:

This book untitled Extended Electromagnetic Theory, Space Charge in Vacuo and the Rest Mass of Photon (World Scientific Series in Contemporary Chemical Physics) to be one of several books in which best seller in this year, honestly, that is because when you read this book you can get a lot of benefit into it. You will easily to buy that book in the book shop or you can order it through online. The publisher on this book sells the e-book too. It makes you more readily to read this book, because you can read this book in your Smartphone. So there is no reason for you to past this book from your list.

Mary Fleeman:

A lot of people always spent their particular free time to vacation or even go to the outside with them friends and family or their friend. Were you aware? Many a lot of people spent these people free time just watching TV, or perhaps playing video games all day long. If you want to try to find a new activity that is look different you can read any book. It is really fun to suit your needs. If you enjoy the book which you read you can spent all day every day to reading a e-book. The book Extended Electromagnetic Theory, Space Charge in Vacuo and the Rest Mass of Photon (World Scientific Series in Contemporary Chemical Physics) it is very good to read. There are a lot of folks that recommended this book. These folks were enjoying reading this book. In case you did not have enough space to create this book you can buy typically the e-book. You can m0ore effortlessly to read this book through your smart phone. The price is not too expensive but this book features high quality.

Jennifer Bedard:

Within this era which is the greater person or who has ability in doing something more are more precious than other. Do you want to become among it? It is just simple solution to have that. What you must do is just spending your time not much but quite enough to get a look at some books. One of several books in the top collection in your reading list is definitely Extended Electromagnetic Theory, Space Charge in Vacuo and the Rest Mass of Photon (World Scientific Series in Contemporary Chemical Physics). This book that is qualified as The Hungry Inclines can get you closer in becoming precious person. By looking up and review this book you can get many advantages.

Jeannie Brenner:

That guide can make you to feel relax. This particular book Extended Electromagnetic Theory, Space Charge in Vacuo and the Rest Mass of Photon (World Scientific Series in Contemporary Chemical Physics) was colourful and of course has pictures around. As we know that book Extended Electromagnetic Theory, Space Charge in Vacuo and the Rest Mass of Photon (World Scientific Series in Contemporary Chemical Physics) has many kinds or genre. Start from kids until teens. For example Naruto or Private investigator Conan you

can read and think that you are the character on there. So , not at all of book tend to be make you bored, any it offers up you feel happy, fun and chill out. Try to choose the best book for yourself and try to like reading which.
