Mathias Roth

This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1860 edition. Excerpt: ...easily performed. 4 Mr., 40 years old, of an herculean constitution with the exception of the head, which, in proportion to the body, appears a littlesmaller than it should be. He fell, when three years old, from a window which was thirty feet high, and attributes to the shock received at the time his present complaint; although he was able as a boy and youth to walk and run as well as other boys, still he was nicknamed in school as the looseltmbed boy. He stoops very much, and the chest is flat; the whole right side is much weaker than the left; he is very weak in the lumbar part of the spine, and consequently has not the power of standing or sitting without constantly moving the trunk to and fro, or from forwards, backwards; the lateral and lumbar curvature has the convexity to the left, and is combined with a posterior curve; the head is bent forward, the eyes are turned up when looking at things or persons in front of him, a tremulous motion of the eyeballs is observed, accompanying the usual movements of the eye. Not being able to stand, he tries to lean either with the back to the wall, or with one side, and he assists himself with the elbow and forearm, which is raised so that the hand is at the height of the shoulder; but even when leaning in the standing position the feet are placed apart, the head is always inclined forwards, and there is a constant tendency to raise the forearms, while the upper-arms and elbows are near the body. When he wishes to walk, which can be done safely only while assisted by a second person, he has no control over the quick and involuntary movements which have frequently caused very serious falls, and, indirectly, a fear of falling, which interferes with his control over the movements; the walk is...
