William Dampier

Memoirs of a Buccaneer: Dampier's New Voyage Round the World, 1697 (Dover Maritime) William Dampier

It was William Dampier's passion to see the world that turned him into a buccaneer. He possessed remarkable powers of observation and analysis, and his life as a seventeenth-century navigator aboard pirate and privateering ships is brilliantly detailed in his journal. Throughout his travels of Central and South America and the East Indies, Dampier provides riveting accounts of sea battles against Spanish treasure ships, as well as pirate life, lore, and customs. Originally published in 1697 as the *New Voyage*, his journal became an instant success, and has been read ever since as one of the greatest travel and adventure accounts ever written.

But *Memoirs of a Buccaneer* is far more than historical adventure. Dampier was a man of intelligence and education with a strong naturalist's urge, and his book quickly became a vital source of information on the geology, biology, zoology, and peoples of the lands he visited. His descriptions of the West Indian manatee, booby birds, cacao, and mangrove trees—flora and fauna never before heard of in England and the Continent—are incredibly accurate. His notes on the produce of Guam and Mindanao—coconuts, vanilla beans, bananas, breadfruit, and more—exerted a powerful influence on Britain's explorations and colonizations. And his depictions of Central America's Mosquito Indians and the natives of Mindanao proved to be highly reliable.

The influence of this classic book on the work of later travelers is incalculable, leading writers such as Defoe, Swift, and Coleridge to borrow both facts and literary style from it. It continues to inspire readers today.
