## EL CANCER DE COLON Y RECTO, ALBERT ABA VARIOS AUTORES

El cáncer de colon y recto, sumando ambos sexos, representa el tumor de máxima incidencia en España actualmente. Tan alta prevalencia expone a la medicina primaria a la complejidad del diagnóstico, así como a las complicaciones generadas por el tratamiento del cáncer. Ante esta realidad, la presente obra aspira a llenar un hueco generado por la literatura especializada, excelente por otro lado, ofreciendo al médico de atención primaria los aspectos básicos de concepto, riesgo hereditario, signos de alarma y estrategias generales de tratamiento. Todo ello sin la necesidad de profundizar en porcentajes y pautas de quimioterapia (presentes en forma de tablas para quien desee conocerlas), de poco interés para un médico no dedicado al tratamiento del cáncer. El lector también encontrará descritos los efectos secundarios de la quimioterapia, así como su tratamiento, un problema que resulta de gran interés por ser altamente frecuente en la consulta ambulatoria. Esta obra nace bajo los auspicios de los laboratorios Merck España y está dirigida por el prestigioso doctor Albert Abad Esteve, del Servicio de Oncología Médica del Hospital Universitari Germans Trias i Pujol (Institut Català d'Oncologia). El doctor Abad Esteve ha contado con la colaboración de eminentes especialistas que, en esta ocasión, se dirigen de manera clara y sencilla a sus colegas no oncólogos para ofrecerles una revisión de los aspectos más importantes de esta neoplasia.
