Panorama of Creation Dr. Carl Baugh

This book is based on Dr. Baugh's work at the Creation Evidences Museum. Fact: Before the great Flood the world was encased in a compressed water canopy in which the hydrogen atoms bonded to form a superconductive firmament bathing the world in pink-dominated light. Fact: Before the Flood the oxygen content of the atmosphere was much greater than it is today to allow for bigger animals, and a higher oxygen content in the water made possible abundant marine life of enormous sizes. Fact: Plant life was much larger and possessed higher vitamin and mineral content to sustain large life forms like the dinosaur.
