If this new century will be remembered for any outstanding achievements, the discovery of human-looking androids is certainly going to be high on the list. The Man Who Discovered Androids is truly a strange story about a man who using his otherworldly perception pierced through the veil of reality and identified three synthetic persons on Capitol Hill. Paris Tosen grew up a generalist in Canada in a turbulent and traumatic family environment. As he explains his unfortunate childhood, Tosen also reveals aspects of one of the most imaginative, and surprisingly true, discoveries in the 21st century.
